LOOKING FORWARD

- ✓ The intervention of **FREEDOM** in rural areas as well as in urban slums has initiated group-building processes for sustainable development and growth.
- ✓ The basic objective behind this is evolving strong Peoples' Organization within the community so that the interest of the community can be taken care of and voice be raised to minimize their exploitation and the injustice caused to them. We always aim at developing and exploring the potentiality of local leadership for sustainable socio-economic development.
- ✓ **FREEDOM** is making a number of efforts to strengthen Peoples' Organizations and has planned to make more meaningful intervention in future years to improve the standard of living of the people particularly the poorest of the poor by enhancing their livelihood sources. In the future year's displacement or migration is going to be a major problem due to growth of industries and other mega developmental projects in our area. There are many instances of lack of proper rehabilitation or no rehabilitation at all of the displaced. To add to this the low productivity of the agriculture land left behind, after the acquisition of land and following that the hardship to sustain on the face of the industrial people will force the local people to migrate. The displacement or migration affects the children first, their education and health jeopardized. Certainly it affects the livelihood of the household also.
- ✓ **FREEDOM** intends to create certain positive impact on community, particularly the poor and the marginalized through its activities & programs. The impact or changes are both tangible & non-tangible, but the nontangible part is the main element in the developmental process. The process of institution building will certainly create "**Body of Opinion Makers**" and Natural Leaders in the community. Local community is mobilized and organized so that it take a proper shape and in due course take active participation with leadership in the development of the region.
- ✓ These initiatives shall have "ripple effect" in the region. The ripple effect in the surrounding area requires right direction & streamlining for this **FREEDOM** will have to facilitate the expanded community initiatives.
- ✓ Besides, being actively involved in liaisoning with Government agencies and facilitate Community Based Organizations to do advocacy for pro-people policies so that the community have control over the local resources and sustainable livelihood sources can be developed.
- ✓ **FREEDOM** envisages enhancing the skills and capacities on technical, managerial and other aspects of the grass root organizations by providing them professional support in terms of training and other necessary inputs and thereby work as support agency keeping focus on nurturing emerging leadership. **FREEDOM** purpose is to strengthen the existing community based institutions and facilitate their consolidation so as to enable them self-reliant and viable from socio-economic and political point of view.
- ✓ **LAC Cultivation, dry mushroom cultivation, Du campaign, Malatpatapur model Gp, Nursing and skill Development centre with Digital India common service centre ,SOLAR AND GREEN GP at Durgadaspur ,children parliament for their issues facilitation is more sustainable plan for future plan.**
